📍 Himachal Pradesh, India

Summary

Experienced Full Stack Developer proficient in MERN stack, Azure services, and Power BI. Skilled in building scalable applications with AI integration, real-time features, and data visualization. Passionate about delivering efficient solutions through proactive problem-solving and continuous learning.

Experience

Software Engineer I

MAQ Software

June 2023 – Present

- Developed natural language to SQL generator using Agent AI, FastAPI, React, Azure OpenAI, and Azure Search
- Designed Databricks database architecture for user data storage and query history tracking

Associate Software Engineer

MAQ Software

July 2022 – May 2023

- Built data extraction system for Power BI RLS reports using DAX queries and XMLA endpoints with Snowflake integration
- Optimized Excel export using SAX streaming approach, improving performance for large datasets
- Created Power BI hierarchical slicer custom visual with search, sorting, filtering, and virtualization using react-window

Education

Bachelor of Engineering in Computer Science

CGPA: 9.12/10

Chitkara University Institute of Engineering Technology, Rajpura

Aug 2021 – Present

Senior Secondary Education

April 2021

DAV Public School Gohar, Mandi

Certifications

Microsoft Certified: Fabric Analytics Engineer Associate (DP-600)

Microsoft Certified: Data Engineer Associate (DP-700)

Advance Web Development — CodingNinjas

Introduction to Python — CodingNinjas

Object-Oriented Programming in Java — CodingNinjas

Projects

Youth Organization Web App

React, Node.js, MongoDB, MUI, Vercel

- Built role-based platform for youth organization to manage monthly contributions and member records with RBAC
- Deployed full-stack application on Vercel with Cloudinary for images and Nodemailer for email notifications

Carpooling Application

React, Express.js, Node.js, MongoDB, Razorpay, Google Maps API

- Developed user-friendly ride-sharing platform with Google Maps API for route calculation and visualization
- Integrated Razorpay for secure payment processing, enabling seamless ride creation to transaction completion

Real-time Chat Application

Vite.js, Chakra UI, Express.js, Socket.IO, MongoDB

- Built real-time messaging app with WebSocket technology, reducing message delivery time by 50%
- Implemented notification system for new messages and group activities, increasing user engagement by 20%

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, C/C++ , SQL, DAX

Frontend: React.js, Vite.js, Material-UI, Chakra UI, Tailwind CSS

Backend: Node.js, Express.js, FastAPI, Socket.IO, RESTful APIs

Databases: MongoDB, Databricks, Snowflake, MySQL, Firebase

Cloud & Tools: Azure (OpenAI, Search), Power BI, Vercel, Render, Git/GitHub, Cloudinary

Concepts: Data Structures & Algorithms, OOP, Agent AI, Real-time Communication, RBAC

Achievements

Solved 500+ DSA problems across LeetCode, GeeksforGeeks, and Coding Ninjas

Successfully completed one-month web development internship at Octanet Services
